

To the Selection Committee of the MBZUAI Machine Learning Winter School 2026,

It is my pleasure to recommend Abdurrahman for the MBZUAI Machine Learning Winter School 2026: Representation Learning & GenAI. I have had the privilege of working closely with Abdurrahman on the development of an AI-driven platform that helps healthcare professionals transition into industry roles. In this project, he led the design and implementation of our core technology, including an AI-powered CV builder and automated job-matching system, demonstrating an impressive command of machine learning, product design, and applied AI systems.

From our collaboration, I've observed that Abdurrahman approaches AI development with both technical rigor and creative insight. He independently designed a real-time CV generation system capable of parsing and restructuring user data through OCR and NLP techniques – with the longer-term goal of fine-tuning models to personalize recommendations for career transitions. He also proposed and began designing an AI career coach feature intending to use structured prompting techniques, drawing from his prior experience in building AI systems in other industries, such as oil and gas.

Beyond his technical skill, Abdurrahman brings exceptional clarity of thought, the ability to bridge business and AI strategy, and a genuine drive to create technologies that have real human impact. His deep interest in generative AI, strong Python and ML background, and capacity to lead product-oriented AI development make him an excellent fit for the Winter School's focus on representation learning and generative modeling.

I am confident that Abdurrahman will not only benefit from but also contribute meaningfully to the program, bringing a unique applied perspective to theoretical discussions. He stands out as a technically adept, forward-thinking engineer who combines intellectual curiosity with executional discipline.

Please don't hesitate to contact me at [Abdul@peerr.io](mailto:Abdul@peerr.io) should you require any further information.

Kind Regards,  
Dr Abdul Rahyead  
Co-Founder Peerr
